

# Traffic Technology 2000

Road Safety with a System

## We'll keep the Wildlife off the roads

### The Benefits

- Reduces accidents
- Saves human lives
- Protects our Wildlife

Too many accidents occur where wildlife is close to the roads. Many human lives are lost due to animals crossing the roads. The Wildlife protector from *Traffic Technology 2000* does provide an overall safer driving environment.

The specially designed **red** reflector disburse an oncoming vehicle's head lights out into the open field, helping to keep animals off the roads.

An absolute "must" wherever wild animals have a tendency to cross the roads.

### The Product

High quality product available in 1.2 and 1.6m height

Highly UV resistant Polyethylene post.

Three different reflectors are available, depending on the landscape
